

MOTOTRBO
R7

BE HEARD ABOVE ALL ELSE

**PROVIDING NEXT-LEVEL NOISE CANCELLATION,
LOUDNESS, AND CLARITY, SO YOU CAN HEAR AND BE
HEARD ANYWHERE YOU OPERATE.**

How long does it take for your team to hear and be heard in your loudest operating environments? How is the delay in communications affecting your operations?

Hear clearly the first time – when it matters most – with MOTOTRBO R7.

MOTOTRBO R7 is a digital portable two-way radio offering game-changing audio capabilities in a rugged, future-ready device. Its advanced audio processing ensures that your communications are heard loud and clear, while its rugged construction is ready for harsh environments, and advanced connectivity options get your workforce ready for tomorrow.

SHARP, CLEAR AUDIO TO COMMUNICATE IN ANY SITUATION

Providing next-level noise cancellation, loudness and audio clarity, MOTOTRBO R7 excels where audio communications can be challenging. Featuring Adaptive Dual Microphone Noise Suppression for increased clarity, Automatic Acoustic Feedback Suppression for a seamless voice experience in tightly packed areas, and Intelligent Audio to monitor and adjust speaker volume over background noise, the MOTOTRBO R7 lets your team hear and be heard the first time.

BUILT TO OUTPERFORM AND CONNECT WHEN IT COUNTS

Powered by MOTOTRBO systems, R7 is ready to connect your team with customized voice coverage anywhere you do business. Built rugged and tested to meet military standards, the MOTOTRBO R7 is tailored for business, tested to outlast the toughest environments, and ready to outperform your requirements and expectations.

MOTOROLA SOLUTIONS TECHNOLOGY ECOSYSTEM

Motorola Solutions has developed the first and only technology ecosystem that unifies voice, video, data and analytics in a single platform, enabling your enterprise to work together in more powerful ways. We call it [Safety Reimagined](#). MOTOTRBO R7 is built into this ecosystem so you can keep your team connected and streamline critical communications, while collaborating with video security systems, sensors and more.

MOTOTRBO R7 IN ACTION DURING A MANUFACTURING WORK DAY

In the manufacturing industry, workers face a multitude of challenges including connectivity issues and noisy environments. Enormous plants and facilities make it difficult for workers to remain connected to all teams and areas of their work environment – not to mention the loud noise levels that can interfere with clear communication. Break down those communication barriers with the help of MOTOTRBO R7.

INCREASE CONNECTIVITY, MINIMIZE DOWNTIME

Keep your operators connected across every inch of your large facility with superior signal strength and robust networks. Overseeing the widespread and diverse areas and machinery of your facility can be a challenge. From controlling multiple points of entry, monitoring worker safety and securing and monitoring key areas and equipment, efficient communication plays a critical role in improving situational awareness and decreasing response times to potential safety issues and operational problems.

AUTOMATED COMMUNICATION

With integrated awareness tools, like [Orchestrate](#), send automatic alerts to your entire operations directly on their radio when there are area breaches, unauthorized persons on your property as well as loitering and presence detection. Alerts can be configured to be sent to predefined user groups, individuals, or all staff to keep all operations informed. Now, whenever a potential incident arises MOTOTRBO R7 can ensure your team is automatically notified as well as heard loud and clear the first time.

BUILT TO ENDURE

We know you need a radio that not only meets the requirements of the harshest environments, but one that outlasts those requirements and expectations. MOTOTRBO R7 is tested to meet military standards, and built to outperform whatever is thrown its way. R7 is intrinsically safe, so you can use it in hazardous environments. When a worker drops their device, or it is left behind during an evacuation – know your device is built to endure, without the risk of ignition or fire.
